PROFESSIONAL SUMMARY

B.E. graduate in Artificial Intelligence & Machine Learning with hands-on experience in Software Engineering, Full-Stack Development, Machine Learning, and Generative AI. Completed a Software Development Engineer internship contributing to production-grade applications using Flutter, React, Node.js, MongoDB, REST APIs, and Git. Experienced in Python, Java, SQL, scikit-learn, TensorFlow, PyTorch, RAG, LLMs, and LangChain, with projects spanning AI-powered applications, document intelligence, and anomaly detection.

EDUCATION

SHRI MADHWA VADIRAJA INSTITUTE OF TECHNOLOGY & MANAGEMENT

Bantakal, Udupi

Bachelor of Engineering in AI/ML

Cumulative GPA: 8/10

Relevant Coursework: Data Structures, Software Engineering, Operating Systems, Algorithms, Artificial Intelligence, Database Management Systems.

EXPERIENCE

Software Development Engineer (SDE) Intern

AlgoOrbit Innovations Pvt. Ltd. | Karkala, Karnataka

Jan 2026 – May 2026 (4 Months)

Technologies: Flutter, React, Node.js, MongoDB, REST APIs, Git

- Contributed to the development of TrionCam, a production-grade citizen issue reporting platform used for real-world civic issue management. Developed and maintained scalable backend APIs and integrated frontend components to deliver responsive and user-friendly applications.
- Implemented secure authentication, authorization, and database integration for seamless user management and data handling.
- Collaborated with cross-functional teams using Git and Agile practices to test, debug, and deliver production-ready features.

SKILLS

Languages: Python, Java, JavaScript, SQL, Dart, C

Software Development: React.js, Node.js, Flutter, Flask, REST APIs, HTML, CSS

Generative AI: RAG, LangChain, LangGraph, LLMs, ChromaDB, Embeddings

Artificial intelligence and machine learning: Machine Learning, Deep Learning, NLP, Computer Vision, Predictive Analytics, Anomaly Detection

AI/ML Libraries: TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, Matplotlib

Databases: MongoDB, MySQL, SQLite

Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook, Google Colab

Data/Visualization: Power BI, Tableau

CERTIFICATIONS

- C Programming (Code Chef)
- Introduction to Generative AI (Google Cloud Skills Boost)
- Introduction to Large Language Models (Google Cloud Skills Boost)

PROJECTS

TRIONCAM – Smart Citizen Issue Reporting Platform (*Internship Project*)

Jan -May 2026

Technologies: Flutter, React.js, Node.js, MongoDB, REST APIs, Git

- Contributed to the development of a production-grade citizen issue reporting platform for real-world civic issue management.

- Developed and integrated scalable backend REST APIs and responsive frontend components using Flutter, React.js, and Node.js.
- Implemented secure authentication, role-based authorization, and MongoDB database integration.
- Collaborated with cross-functional teams using Git and Agile development practices.
- Assisted in testing, debugging, and deploying production-ready software.

SMART ELECTRICITY MONITORING & ANOMALY DETECTION

Completed 2026

Technologies: ESP8266, Sensors, ThingSpeak, Arduino IDE, Python, Isolation Forest

- Developed an IoT-based system for real-time monitoring and analysis of electricity consumption across multiple appliances.
- Implemented **Isolation Forest-based anomaly detection** to identify unusual energy consumption patterns from collected sensor data.
- Designed a modular and scalable monitoring solution with **real-time alerts** for abnormal consumption, helping identify energy inefficiencies and reduce wastage.

RAG DOCUMENT INTELLIGENCE ASSISTANT

Completed 2026

Technologies: Python, LangChain, ChromaDB, Hugging Face, Streamlit, LLMs

- Developed a Retrieval-Augmented Generation (RAG) application for querying and retrieving information from uploaded documents using semantic search and LLM-based generation.
- Implemented document ingestion, text chunking, embeddings, vector storage with ChromaDB, and context-aware response generation.
- Built an interactive Streamlit interface for document-based question answering and integrated LLM APIs for generating grounded responses.

CAREERWISE - AI DRIVEN CAREER COUNSELLING PLATFORM

Sep 2024

Technologies: React, Node.js

- Developed a full-stack web application using React, Node.js, and SQLite to recommend personalized career paths based on an interactive skill and interest assessment.
- Implemented a multi-step onboarding flow with profile creation, skill assessment, and personalized career recommendation logic.
